GBV REFERRAL PATHWAYS

Smallholder Commercialization Agribusiness And Development Program **(SCADeP)**

Important steps in finding Referral Pathways:

To establish a Referral Pathway the most important steps are:

1. **Service provider mapping: this is a critical step which ideally should be done during project preparation.**

2. **Second step is for us to know the nature, location and availability of services in order to make referrals and,**

3. **Thirdly the quality of GBV services available.**

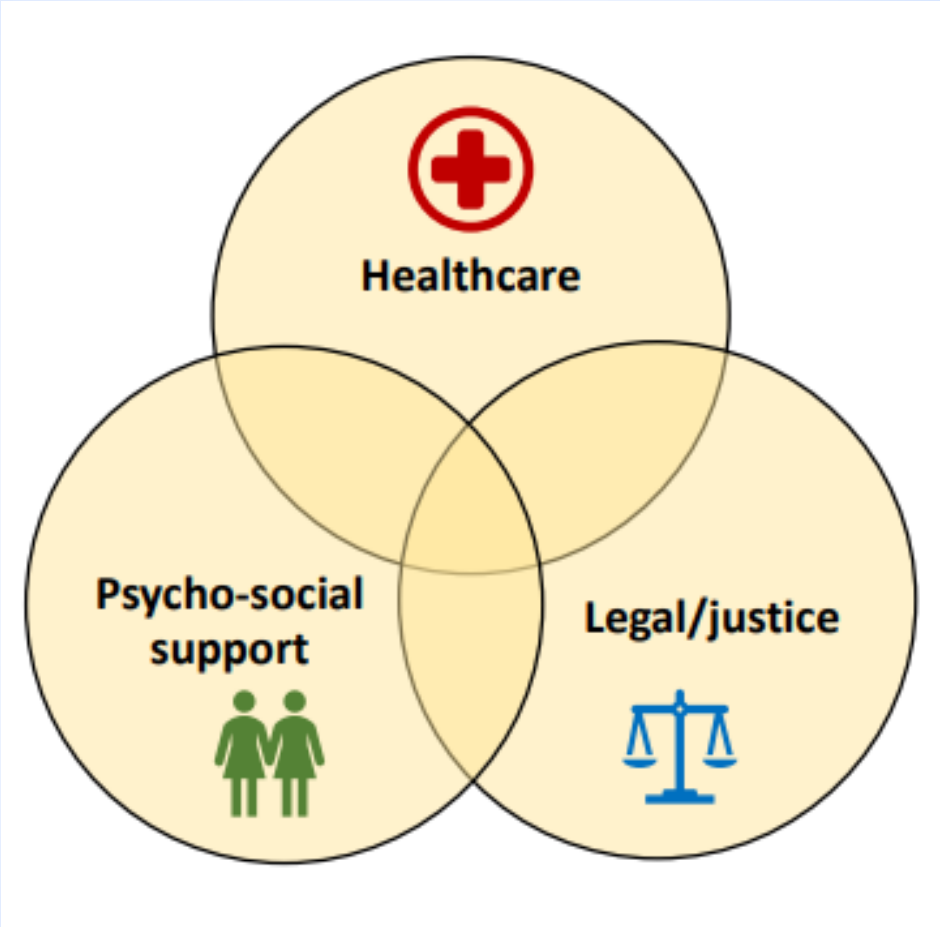
Services Provided:

- Transportation
- Medical Services
- Psychosocial Services
- Human Right
- Security
- Safe Shelter
- Court Process

Referring a survivor to GBV services is a crucial role, it has to be with consent/choice of the complainant/survivor.

The most critical services are:

- Healthcare
- Psychosocial Support
- Legal Aid/Domestic Justice System
- Other services:
  Case Management, Shelters, Livelihood Support, etc.
- To make a referral, SCADeP operators must know which services are available in their area . . .



Healthcare
Psycho-social support
Legal/justice

IMPORTANCE OF DOING REFERRAL:

In doing referral;

1. The importance of minimizing further trauma to the survivors must be emphasized,

2. And the efficiency of professionals who are in place to support them must be maximized.
